

testing::TestWithParam< int >

testing::TestWithParam< MyType >

ValueParamTest

```
graph BT; VP[ValueParamTest] --> T1[testing::TestWithParam< int >]; VP --> T2[testing::TestWithParam< MyType >];
```

The diagram illustrates a base class 'ValueParamTest' at the bottom, which has two arrows pointing upwards to two derived test types: 'testing::TestWithParam< int >' on the left and 'testing::TestWithParam< MyType >' on the right. All elements are enclosed in rectangular boxes.
